SUMMARY

Front-End Developer with hands-on experience building responsive, data-driven web applications using Next.js, React, and Node.js. Skilled at transforming business requirements into clean, functional, and user-friendly interfaces. Strong understanding of RESTful APIs, state management, and dashboard design. Passionate about creating smooth digital experiences that improve usability and business efficiency.

Skills

HTML, CSS, JavaScript, React.js, Next.js, TypeScript, Tailwind, GitHub, RESTful APIs.

Experience

CRM Ticketing System

Tech Stack: Next.js, Node.js (Express), PostgreSQL, RESTful APIs

Developed a full-stack ticket management system for the CRM team at **BALY**, enabling agents to create, view, and manage trip-related tickets.

- Built responsive frontend using Next.js and RESTful API integration.
- Dashboard with categorized tabs (Quality, Fake Ride, CDC).
- Added filters, CSV export, pagination, and multi-ticket deletion.

🔗 Demo: balytickets.netlify.app

Driver Incentive Tracker

Tech Stack: Next.js, RESTful APIs, CSV Data Integration

A web app that displays driver incentive performance, enabling the CRM team to analyze driver data efficiently.

- Search drivers by ID to view daily incentive records.
- Displays **Date**, **Incentive Status**, and **Fraudulent Trips** in a dynamic table.
- Integrated backend APIs for real-time data rendering.

🔗 Demo: incentive-production.up.railway.app
